OBJECTIVE: To utilize my skills as a **Plumbing Designer** for commercial, residential, and healthcare projects.

QUALIFICATIONS & STRENGTHS:

- Over 15 years experience in design of plumbing systems for historic buildings, schools (K through 12 and college), Commercial and Residential Buildings, Hotels, and Hospitals.
- Ability to use AutoCAD and Microstation to deliver accurate, on-time design plans, and trained in the use of Revit.
- Proficient at managing concurrent tasks such as sanitary and vent systems, hot/cold water and storm systems, natural and medical gas systems, and multiple projects.
- Skilled at coordinating with architects, interior designers, and structural, electrical, and mechanical engineers
- Ability to review proper design specifications with inspection teams and general contractors to ensure correct installation of plumbing systems.
- Strong written skills, utilized during inspection reviews and final inspection reports.
- Proficient at reading and analyzing shop drawings.
- Skilled with design of HVAC systems for smaller projects.

ACHIEVEMENTS:

- Designed very difficult, unique roof storm system for new airport terminal building.
- Recognized by previous employer for exceptional analysis and calculations on approximately 100 projects.
- Designed and laid out a Sovent sanitary vent system for a historic, 15-story hotel.
